

Professional Development on March 6th, 2012

On March 6th, 2012, all Anthony Wayne Local Schools employees will take part in professional development activities. The professional development activities are designed to provide a foundation for the achievement of the goals within the District Continuous Improvement Plan. The certified staff will continue their work on curriculum design and implementation of the newly adopted Ohio standards for the 2013-14 school year. Additionally, the 5-12 certified staff will review the new student attendance program and on-line grade program to be implemented in the 2012-13 school year. The classified staff will participate in activities within their departments. The activities will address the goals for their department and the district goals. Our staff is excited to have this opportunity to professionally grow to optimize student achievement and provide the highest quality of services to our students, parents, and community.
